A Schiffer Book

Lilac Time

This room was designed for conversation and entertaining. A set of paintings and a few knick-knacks provide some decoration without being overpowering and distracting. They are prominently and proudly displayed in a pair of recessed shelves on either side of the window. Two armchairs are set back closer to the wall to make a path so visitors can move freely around the room. The black lacquered floor is criss-crossed with lavender stripes to complement the soft color of the lavender walls. Zebra-striped pillows are an exciting, vibrant touch.
